

EFERGY ENERGY MONITORING SOCKET INSTRUCTIONS

You must read the EFERGY Energy Monitor Loan Scheme Information document containing Teams & Conditions and Health & Safety information before borrowing the energy monitor.

The Efergy Energy Monitoring socket measures the energy efficiency of your plug-in appliances. Track the kilowatts used by your appliances and find how much they are costing you. You can then reduce the use of a costly appliance or replace it with a more efficient one.

THIS MONITOR IS NOT TO BE LOANED TO ANYONE UNDER THE AGE OF 18. DO NOT LET CHILDREN PLAY WITH THIS EQUIPMENT. DO NOT LEAVE THIS EQUIPMENT UNATTENDED IN THE PRESENCE OF CHILDREN.

To set up

1. Before use the power supply must be visually inspected and not used if there is any damage. Please be careful when storing the equipment not to damage it in any way.
2. Plug in the device to an electrical socket.
3. Plug in any household device into the Efergy Energy monitoring socket.

Ensure you have your tariff information from your electricity bill

You may have only one tariff (approximately 10-15p per kw) or you may have more if you have a cheap overnight deal.

Setting up a Single Tariff

1. Press and hold the **COST** button, the currency symbol will flash.
2. Use the **up** and **down** keys to choose **£**. Press **COST** to set.
3. Use **up** and **down** to choose **TARIFF 1**. Press **COST** to set.
4. Use **up** and **down** to set the tariff cost. Press **COST** to move onto the next digit.
5. Repeat until you have entered each digit. Press **COST** to exit.

Setting up a Dual Tariff

Follow instructions 1 and 2 but then select **DUAL TARIFF**

1. Use the **up** and **down** button to set a start time for tariff 1, press **COST** to move onto next digit.
2. Repeat process to set **TARRIF 2** start time.
3. Use same process as above to set separate costs for tariff 1 and 2.
4. Press **COST** to exit.

It will display the consumption in watts and the cost per year. You can also view the accumulative cost and the cost per day by pressing the **COST** button.

Setting the Time

1. Press and hold the **up** button.
2. Press **energy** to begin setting the time, one digit at a time.
3. Use **up** and **down** to set each digit.
4. Press **energy** to confirm and **COST** to exit.

Warning: Do not use plug if socket looks unstable or if you have wet hands.

Monitoring energy use

If you would like to monitor your energy use and costs an EFERGY ENERGY MONITORING SOCKET monitoring table is available to download at www.brent.gov.uk/energymonitors
