Supported Internships with CNWL
Structured, supported training in the workplace

Who are supported internships for?
A Supported Internship is aimed at individuals with a recognised Learning Difficulty and/or Disability. It is open to individuals aged 16-24 years who hold a Learning Difficulty Assessment (LDA) or an Education, Health & Care Plan (EHCP).

What is a Supported Internship?
CNWL is delivering Supported Internships in partnership with the West London Alliance under the Project Search model. Supported Internships are designed to develop transferable skills, knowledge and attitudes in readiness for paid employment. The programme is unique in its approach, in that the education programme is based almost entirely at an employer’s location five days per week throughout the college year. Students therefore get real-life experience dealing with colleagues and customers in the workplace, while being supported by a college providing training input.

What skills are developed?
Students will develop a range of essential skills and qualities desired by employers; Employability, Confidence, Reliability, Customer Service, Maths, English and ICT whilst working alongside real employees, in a real employment setting. The course is the final step of your education journey prior to finding full-time paid employment.

What kind of workplace is providing CNWL’s Supported Internships?
The West London Alliance is running successful Supported Internships in large companies including GSK, Hilton, Whipps Cross Hospital and St George’s Hospital. CNWL is working with Imperial Healthcare College Trust at Charing Cross Hospital.
