

## **Brent Council Support to ASC Providers**

Brent Council has provided significant amounts of support to the social care sector in Brent during the Covid-19 pandemic. Much of the specific support provided to Care Homes was outlined in our letter to the Department for Health and Social Care on 29<sup>th</sup> May 2020.

In addition to this, Brent has taken the following steps to support providers during the pandemic –

- Spent over £1.5m on PPE, which has been distributed to care providers based in Brent on a per bed or per client basis. There have been weekly distributions of PPE to all providers in the borough, whether the council commissions care from them or not. We have also supported homecare, care home and supported living providers with PPE, and continue to do so.
- Continued to pay for homecare provision based on commissioned hours in March 2020, despite the ending or suspension of a significant number of care packages. Our hourly rate for homecare was also increased to £16 per hour from 1<sup>st</sup> April 2020 in response to Covid-19, the equivalent of a 5% uplift.
- Provided supported living and extra care providers a 2% uplift, at a cost of £400,000
- Ensured at all Residential and Nursing Placements are paid in accordance with the 20-21 WLA framework prices, increasing spend by £200,000
- All residential, nursing and supported living placements were paid in advance for April, May and June. Payment terms for all Adult Social Care providers changed to immediate payment once the invoice has been received. Additionally, a loan payment of three months in advance can be made to providers who are facing short-term cash flow problems. This offer is still open to our providers.
- Funded day care providers based on services commissioned in March 2020, despite day care provision in the borough being closed. This is to ensure that the day care market remains viable during the pandemic. Brent has spent £340,000 on this.
- Delivered infection control and PPE training to 151 adult social care providers free of charge, to support them during the pandemic. This work has been led by Brent's Public Health Team.
- The Council is directly finding and paying for agency staff to be deployed to care homes who are unable to fill all shifts due to care home staff self-isolating and sickness. To date Brent Council has spent £29,000 on this initiative.
